IMRAN SHAIKH

Ahmedabad, India • is746245@gmail.com • +91 7574916840 • linkedin.com/in/is-imran-shaikh • 15-Day Notice

PROFILE

Python Developer (Django) with 3.5 years of experience building secure, scalable web applications and RESTful APIs using Django, DRF, and FastAPI, deployed on AWS (EC2, S3, RDS, Lambda). Strong in Django ORM, query optimization, OOP, and relational databases (PostgreSQL, MySQL), with hands-on authentication/authorization (JWT, OAuth2, RBAC), Linux environments, and Git-based collaboration with front-end and DevOps teams. Based in Ahmedabad, with a 15-day notice period.

WORK EXPERIENCE

Software Engineer (Contract) · Ansh Infotech *May 2026 – Present*

- Designed, developed, and deployed scalable Django web applications and REST APIs (DRF, FastAPI) for integration with front-end and third-party services, from requirement gathering to deployment.
- Implemented secure JWT-based authentication, authorization, and role-based access control (RBAC) for multi-tenant applications.
- Built asynchronous background jobs and task queues using Celery and Redis for scheduled, production-grade workflows.
- Wrote and optimized PostgreSQL/MongoDB queries; troubleshot application issues, participated in code reviews, and delivered bug-fix and feature tasks through Jira and Git.

Python Developer · X-Byte Enterprise Pvt. Ltd. *June 2023 – May 2026*

- Built production-grade web scraping and data pipelines using Scrapy, Selenium, BeautifulSoup, and Requests, processing millions of records daily.
- Integrated data storage solutions: fetched, processed, and stored data from REST APIs into MongoDB and PostgreSQL.
- Implemented data validation, error handling, deduplication, and logging for reliable, well-documented pipelines.
- Deployed and managed workloads on AWS (EC2, S3, RDS, Lambda) on Linux servers; automated daily data updates and reporting using Celery + Redis schedulers.

Python Developer Intern · Tops Technology *Feb 2023 – Apr 2023*

- Built a full-stack web application using Django and PostgreSQL, reducing manual effort by 40%.
- Applied Django ORM, views, forms, and REST API patterns in a real project environment.

PROJECTS

Reimburse — Travel & Expense Management Backend (SAP SuccessFactors Add-on) | *Python · Django · DRF · PostgreSQL · JWT · Swagger/drf-yasg · Git*

- Designed a tenant-level configuration toggle for enterprise clients, spanning REST APIs, migrations, email templates, and approval workflows.
- Enforced policy consistency across 10+ modules with validation guards on claim CRUD APIs and permission checks.
- Built a rejection-resubmission policy engine for expense/mileage/allowance claims with configurable edit-and-resubmit workflows.
- Fixed currency-conversion and financial-year aggregation bugs, improving data accuracy in claim calculations.

TikTok Shop — Large-Scale Data Scraping Pipeline | *Scrapy · Selenium · BeautifulSoup · MongoDB · Python*

- Designed and built a production-grade pipeline extracting 15M+ records daily; delivered cleaned, deduplicated output to clients, owning the project end-to-end.

Advanced RAG System — Multi-Document Q&A (Personal Project) | *Python · PyMuPDF · ChromaDB · Sentence Transformers · Groq LLM · Streamlit*

- Built a RAG question-answering system over 3 PDF reports with per-document ingestion and retrieval strategies (page-aware, section-aware, table/endnote-aware), vector search with cross-encoder re-ranking, and cited, grounded answers via a Streamlit UI.
- Built an evaluation harness with 42 hand-verified questions: 100% top-5 page hit, 36/36 answerable questions correct, and unanswerable questions correctly returned as not found.

Digital Society | *Python · Django · PostgreSQL · JavaScript · HTML/CSS*

- Built REST APIs with Django serving an HTML/CSS/JS frontend; implemented GitHub OAuth for secure data access and visualized user activity stats.

SKILLS

Backend: Python, OOP, Django, Django REST Framework (DRF), FastAPI, RESTful API Design, Django ORM
Cloud & DevOps: AWS (EC2, S3, RDS, Lambda), Linux, Docker, CI/CD pipelines
Databases: PostgreSQL, MySQL, MongoDB, query optimization, schema design, indexing
Auth & Security: JWT, OAuth2, RBAC, authentication & authorization
Async & Messaging: Celery, Redis, asyncio
Tools & Testing: Git, Postman, Swagger/drf-yasg, Bitbucket, Jira, Python unittest/mock
Front-end & Scraping: JavaScript, HTML, CSS, React.js (basic); Scrapy, Selenium, BeautifulSoup, Requests

EDUCATION

Bachelor of Computer Application (BCA) — CGPA 7.11
Silver Oak University, Ahmedabad · June 2020 – June 2023
